

**AMENDMENTS TO THE ABSTRACT**

Please amend the abstract as follows:

A unit for separating an exhaust gas containing PFC gases including CF<sub>4</sub> and C<sub>2</sub>F<sub>6</sub> ~~generating~~ generated in a production process, wherein the exhaust gas is concentrated in a concentration device, and then separated chromatographically in a chromatographic separation device using nitrogen as a carrier gas. The chromatographic separation device is packed with molecular sieve ~~13-X-13X~~ or F-9 or the like. The unit is capable of effectively separating CF<sub>4</sub> and C<sub>2</sub>F<sub>6</sub> effectively.
